

INSTALLATION INSTRUCTIONS for GROUND EFFECTS for the PT CRUISER

Thank you for choosing Aero-Tec as your resource for Ground Effects for the PT Cruiser.

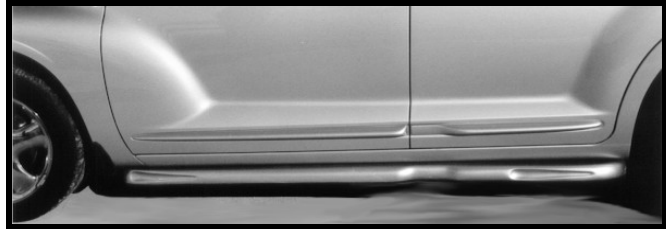

Installation is quick and easy. Please read the following instructions thoroughly before proceeding.

INCLUDED IN THIS KIT:

- 1 - Ground effect, driver side
- 1 - Ground Effect, passenger side
- 1 - Package of 20 self-tapping tek-head screws
- 2 - Aero-Tec emblems

TOOLS REQUIRED:

- Screw gun or variable speed drill
- 5/8" hex head drive
- 1/8" drill bit

STEP 1.

Identify the passenger side and the driver side.
This is noted on the label on the back edge of each part.

STEP 2.

Starting with either side, position the part under the rocker panel and against the "pinch-weld" as shown here to familiarize yourself with the proper placement and fit.

STEP 3.

Attach the ground effect.

STEP 3A.

With the part being held in the position as described, drive five 5/8" tek-head screws through the ground effect upwards into the bottom of the rocker panel. Note figure "A" in the diagram. Place one screw approximately 6" from each end and three more spaced evenly between. Note: Tek-head screws are designed to eliminate the need for "pre-drilling" holes for this step. **IMPORTANT:** Do not over-tighten the screws.

STEP 3B.

Drive four 5/8" tek-head screws through the back lip of the ground effect into the vehicle's pinch-weld. Note figure "B" in the diagram. These are spaced evenly apart beginning from approximately 6" from each end. Due to the thickness of the pinch-weld's steel, this step may be simplified by pre-drilling the holes using a 1/8" drill bit. **IMPORTANT:** Do not over-tighten screws.

STEP 4.

Remove the backing from the enclosed self-adhesive Aero-Tec emblems and apply to a location of your choice on each ground effect.

Please note that these ground effects are not designed or intended to support weight. Avoid attempting to step onto them to enter the vehicle.

CARE & MAINTENANCE:

Once attached to your vehicle, these attractive ground effects become a part of it and should be maintained as such. Proper care will provide long term beauty to compliment your PT Cruiser.
